THE SOLUTION-FIRST METHOD

Why You're Broke (And How I Went From $0 to $15K MRR in 6 Months)

FREE SAMPLE - The First Page That 90% of "AI Experts" Don't Want You to Read

LET ME GUESS...

You've spent the last 90 days watching YouTube videos about AI. You know how to chain tools together. You've built some cool demos. Maybe you even posted them on Twitter.

And you've made exactly $0.

Here's the uncomfortable truth: You're not failing because you lack technical skills. You're failing because you're solving problems that don't exist.

I know because I did the same thing for four months straight. I built "impressive" AI systems that nobody wanted to pay for. I was technically capable and commercially worthless.

THE MISTAKE THAT COST ME 4 MONTHS

Then something clicked. One framework shift:
January: $5K/month client
February: $5K/month client
March: $5K/month client

Same person. Same technical ability. Completely different approach.

WHAT YOU'RE MISSING IN THE FULL 20-PAGE BREAKDOWN:

→ The 3 fatal mistakes keeping you broke (you're probably making #2 right now)

→ The Solution-First Framework: Find $2-5K products in 48 hours

→ How I closed my first client BEFORE knowing how to build (and delivered on time)

→ Building $5K solutions in 3 days using Claude as your senior dev

→ Discovery call framework that reveals what they'll pay $3K+ monthly to fix

→ Which of 3 products to build first (with exact build timelines)

→ The uncomfortable truth about selling before you're "ready"

STOP LEARNING. START EARNING.
